DETAILED ACTION

1. Claims 1-12 have been presented for examination. Claims 1, 2, and 7-9 have been added and claims 10-12 have been added in an amendment filed 11/29/2005.

Docketing

1. This application has been docketed to Primary Examiner Justin T. Darrow in Group Art Unit 2132 in Technology Center 2100.

Drawings

2. The drawings were received on 11/29/2004. These drawings are approved.

Allowable Subject Matter

3. Claims 1-12 are allowed.
4. The following is an examiner's statement of reasons for allowance:

Claims 1 and 4-7 are drawn to a process of controlling the execution of a computer program. The closest prior art, Cable Television Laboratories, Inc. (Williams et al.), International Application Publication No. WO 97/04412 A2, disclose a similar process. However, Williams et al. neither teach nor suggest storing the secret part of a computer program on a non-volatile secure medium of a portable second processing means comprising a chip medium that can be connected to and detached from a first processing means. This particular step explicitly recited in independent claim 1 renders claims 1 and 4-7 allowable.

Claims 2, 3, and 8-12 are drawn to a process of controlling the execution of a computer program. The closest prior art, Cable Television Laboratories, Inc. (Williams et al.), International Application Publication No. WO 97/04412 A2, disclose a similar process. However, Williams et al. neither teach nor suggest a second processing means comprising a portable chip medium that is connectable to and detachable from a first processing means, where all or a portion of the encoded secret part is transmitted from the first processing means to the second processing means. This distinct feature incorporated in independent claim 2 renders claims 2, 3, and 8-12 allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- NRI & NCC Co. Ltd. (Mashita et al.), Japanese Patent Application Publication No. 08-044553 A discloses an open, non-ciphered part and a ciphered part of supply software stored on an internal, secure module.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Justin T. Darrow whose telephone number is (571) 272-3801, and whose electronic mail address is justin.darrow@uspto.gov. The examiner can normally be reached Monday-Friday from 8:30 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gilberto Barrón, Jr., can be reached at (571) 272-3799.

The fax number for Formal or Official faxes to Technology Center 2100 is (703) 872-9306. In order for a formal paper transmitted by fax to be entered into the application file, the paper and/or fax cover sheet must be signed by a representative for the applicant. Faxed formal papers for application file entry, such as amendments adding claims, extensions of time, and statutory disclaimers for which fees must be charged before entry, must be transmitted with an authorization to charge a deposit account to cover such fees. It is also recommended that the cover sheet for the fax of a formal paper have printed "**OFFICIAL FAX**". Formal papers transmitted by fax usually require three business days for entry into the application file and consideration by the examiner. Formal or Official faxes including amendments after final rejection (37 CFR 1.116) should be submitted to (703) 872-9306 for expedited entry into the application file. It is further recommended that the cover sheet for the fax containing an amendment after final rejection have printed not only "**OFFICIAL FAX**" but also "**AMENDMENT AFTER FINAL**".
